# Introduction to Program

The March Mega Learning Program (MMI) 2026 is an intensive, skill-oriented internship designed to provide practical exposure and conceptual clarity across core domains of psychology and criminology.

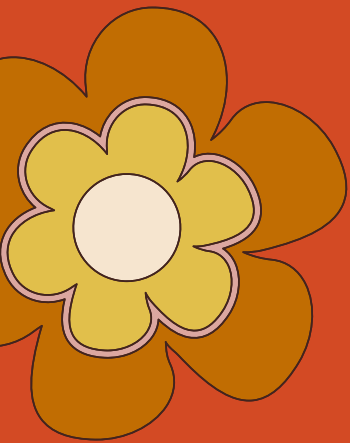

This program is thoughtfully curated for students, early professionals, and psychology enthusiasts who wish to move beyond theory and gain real-world understanding, applied learning, and career-relevant skills within a short yet impactful duration.

Through expert-guided sessions, case-based discussions, and structured learning modules, participants will be trained in key psychological disciplines while developing analytical, observational, and professional competencies essential for the mental health and allied fields..

# Internship Background

The March Mega Learning Internship (MMI) is designed to bridge the gap between theoretical learning and practical application in psychology and allied fields. The program offers focused training in Criminology, Practical Psychology, Child Psychology, DSM Disorders, and Industrial Psychology, providing participants with essential conceptual clarity and real-world understanding.

Through expert-led sessions and case-based learning, MMI enables students and aspiring professionals to gain applied exposure, interdisciplinary insight, and career-relevant skills in a structured online format.
